

Claims

1. An assembly comprising a housing (10) for a battery (16) and a control module (18), said housing having an air inlet (20, 20') and an air outlet (22), said air outlet (22) being adapted to be connected with an intake system of an engine of a motor vehicle.

2. The assembly as claimed in claim 1, characterized in that said housing (10) has a separate battery housing (12).

3. The assembly as claimed in claim 1, characterized in that said housing (10) has a separate control module housing (14).

4. The assembly as claimed in claim 1, characterized in that said air inlet (20) sucks in air from the vicinity of a windshield of said vehicle.

5. The assembly as claimed in claim 1, characterized in that said air inlet (20) sucks in air from an air-conditioning system.

6. The assembly as claimed in claim 1, characterized in that said air inlet (20') sucks in air from an engine compartment.

7. The assembly as claimed in claim 1, characterized in that said battery (16) is disposed downstream of said control module (18).

8. The assembly as claimed in claim 1, characterized in that said control module (18) is accessible only after removal of said battery (16).
